GENERAL OVERVIEW

The **P3 Water Summit** offers two valuable days of project delivery discussions, focusing on project management, planning, and procurement, as well as opportunities for networking with water agency managers and other industry professionals.

Our attendees include senior management from firms in the construction, engineering, design, legal, investment and consulting industries as well as water agency managers, utility directors, public works directors and more from across the nation.

Many attending the Summit are project owners considering alternative project delivery and exploring partnerships.

By sponsoring or exhibiting, you will reach water agency managers and industry players involved in active and upcoming projects. Our audience is interested in products and services related to the delivery of water infrastructure.

Agenda

The **P3 Water Summit** agenda features a broad range of topics specifically tailored to the needs of water agencies evaluating P3s and alternative delivery methods. This program will share examples of where alternative approaches can be applicable; and how they can save money and time when dealing with upgrades, repairs, and maintenance. The program will also highlight when P3s and alternative delivery methods do or do not make sense, and what major considerations need to be made once choosing this route, including the first steps.

The agenda will offer numerous case studies (big, medium and small examples of successful and unsuccessful projects) of how alternative approaches can work. We will also provide a perspective on current activities in the market and update on projects in progress including their challenges and successes.

The agenda takes a clear look at current trends in project delivery, while examining contract structures, facility types, and financing mechanisms in use. Through conversations with owners, private partners, advisers, and stakeholders, the Summit explores best practices and lessons learned from successful partnerships.
