# GENERAL OVERVIEW

The **Healthcare Project Delivery Conference** helps attendees plan and procure successful initiatives, understand best practices in selecting and negotiating with prospective partners, and take steps to ensure project success.

The Conference features a broad range of topics specifically tailored to the needs of hospital facility administrators evaluating their next project. This program will share examples of where different approaches can be applied and how they can save money and time when dealing with upgrades, repairs, and maintenance.

Over 75 leading practitioners will present their firsthand observations of healthcare projects of all sizes in different markets. We will also offer in-depth roundtable discussions for owners and public sector delegates with interest in discussing specific healthcare project issues in a more candid and interactive forum.

Our attendees include healthcare facility management professionals, healthcare construction leaders, designers, architects, medical office building operators, project managers, service and technology providers, design-build professionals, and healthcare administrators representing local, state, and federal facilities.

Many attending the **Healthcare Project Delivery Conference** are project owners considering alternative project delivery and exploring partnerships.

## Agenda

The 2023 **Healthcare Project Delivery Conference** agenda will feature a broad range of topics specifically tailored to the needs of hospital facility administrators evaluating their next project. The program will share examples of where different approaches can be applicable; and how they can save money and time when dealing with upgrades, repairs, and maintenance.

The program will also highlight when certain delivery structures do or do not make sense, and what major considerations need to be made once choosing this route, including the first steps. The agenda will offer numerous case studies (big, medium and small examples of successful and unsuccessful projects) of how alternative delivery can work.

The agenda takes a clear look at current trends in healthcare procurement, construction and design, while examining contract structures, facility types, and financing mechanisms in use. Through conversations with facility owners, operators, and advisers, the Conference explores best practices and lessons learned from successful partnerships.
